GRN is dedicated to giving people the opportunity to hear the good news of Jesus in their own heart language.

Blessed by the gift of salvation in Jesus, we want to tell His story in every language. No language is too small or village too remote.

GRN fulfils its mission through the production of audio recordings. We specialise in using local voices and local music (pictured below) to produce culturally appropriate recordings that are clear and easily understood, especially by non-readers.

We combine these recordings with visual materials such as picture books and videos to produce evangelistic and Bible teaching resources for churches and missionaries around the world.

You too can listen to, download and share our resources free of charge through our websites and mobile phone applications.

The Saber mp3 player (pictured above) is the accumulation of decades of GRN's experience in providing audio resources in remote locations. The hand wind mechanism allows it to be used in communities without access to power or batteries. The robust construction means that it is suited to harsh environments. The large speaker helps facilitate group listening too.

The 5fish app for the iPhone and Android provides a platform for users to download, listen and share our resources via their mobile phone. (pictured right). To download the app go to www.5fish.mobi

The GRN website is another platform for users to download, listen and share our resources. To access the resources go to www.globalrecordings.net/resources

GRN currently has resources in over 6,000 of the world's 12,000 plus languages and dialects. Much has been done, but there is so much more to do.

See overleaf for how you can join the adventure of telling the story of Jesus in every language.
